Raising Funds and Awareness of Breast Cancer and Lymphedema

September 2026

Team Lighthouse at the Sisters by Choice Pink Ribbon Run

Board members and volunteers, Samantha and Bret Martin, Maureen Clark, Deb Cozzone, and Laura Hoffman shared information about lymphedema and enjoyed the day at the 22nd Annual Sisters by Choice Pink Ribbon 5 K in July.

Walkers and volunteers have additional opportunities coming up in the Atlanta area! See below.

Join the **2026 Georgia 2-Day Walk for Breast Cancer** to benefit charities including the Lighthouse Lymphedema Network
that support prevention and treatment of breast cancer and its side effects.
Look for (or join us at) the Lighthouse Lymphedema Network Cheering Station during the walk!

Oct 3 @ 7:00 am – Oct 4 @ 12:00 pm

Visit GAABC

Since 2013, Georgia Alliance for Breast Cancer (GAABC) grants have helped the LLN serve over 350 individuals with breast cancer-related lymphedema. These patients were uninsured, underinsured and/or medically underserved for compression supplies.

For 2026-27, the GAABC granted $10,000 to the Lighthouse Lymphedema Network's Bandages and Garments (BAG) Fund for supplies that are necessary for the maintenance of lymphedema.

A huge thank you to GAABC for helping us to continue serving our community! For more information about how to apply for assistance for yourself or your patients, contact **darnofell@aol.com**

Survivor Legacy 5 K

Support, education, and advocacy for cancer survivors and their families. Join their second annual 5K fundraiser in Snellville on October 17. The LLN will be there with information and support for patients with lymphedema.

Interested in Sharing Your Experience Living with Lymphedema or Lipedema During Pregnancy and Post-Partum?

Progress is being made in the prevention and treatment of lymphedema and lipedema, but the relationship between these conditions and pregnancy is still not well understood! Please consider taking part in a short international survey to help us gain insight into your experience with lymphedema/lipedema and pregnancy! The survey is available in English, Welsh, Italian, Spanish, French, Turkish, Dutch, Hebrew, German, and Chinese. The hope is that the information gained from this study will help shape the understanding and treatment guidelines for lymphedema/lipedema during pregnancy!
